

Security Operations Center Triage Guidelines

1. Alert Acknowledgment: L1 analysts must acknowledge critical alerts within 15 minutes.
2. Escalation Protocol: Incidents involving suspected lateral movement must be escalated to L2 within 30 minutes.
3. Incident Framework: All initial triage reporting must follow the standard CompTIA Security+ incident response life cycle terminology.
4. False Positives: Repeated false positives from the same host must be documented in the exception tracker before tuning the rule.
